

Asian Forum on Light Metals
ALMA Forum 2018
(3rd Circular)

Scope

Asian Light Metals Association (ALMA) is a platform for scientists, engineers, postgraduate and undergraduate students engaged in light metals such as aluminum, magnesium and titanium. ALMA provides them to come and see each other shearing time, new idea, new findings or current items to be deeply discussed. The international forum called *ALMA forum* is designed and organized by ALMA to have a special place to present current topics on light metals from Asian regions such as Australia, China, Korea, Taiwan and Japan. Details for ALMA can be obtained from the following URL.

ALMA2018 is held in Shibaura Institute of Technology Toyosu Campus with The 135th Conference of Japan Institute of Light Metals. The main theme of this year's ALMA Forum is "Environment and Energy", which will be focused on resource, recycle, electrical vehicle (EV), energy, and environment that are related to light alloys. Two invited speaker's representative from each country present novel topics with overview types of presentation.
